

I support HB 6797 and ask that you include prescriptive authority in this bill because it will bring the scope of practice up to that of other states that license Naturopathic doctors. It will also improve the healthcare in this state by reducing, money, time and resources of our patients

My Dr asked me if I could write something for her to read for you to read .

I would have came there today to speak to you today however since I am disabled I am unable to do so. I have a debilitating nerve disease CRPS , Chronic Lyme Disease and Myelitis . When I started my treatment for my diseases I could not afford to pay for the treatments that I needed ; since my insurance company did not cover it . I found Dr Lisa Singley ND whom my insurance did take . I do have to go to other dr's for antibiotics . Which means travel , extra co payments , and hoping that the md understands and respects my treatments that I receive from Dr Singley . This law being passed would help me beyond belief .
